E-Z CONNECTOR SYSTEM...the simple snap fit Connector is quick, effective, strong and provides an excellent electrical connection.

The E-Z connector system is designed to make carbon brush replacement quick and simple.

The E-Z connector can be supplied instead of a standard terminal on most brushes manufactured by Morgan Industrial Carbon, and fits with a simple snap action onto the E-Z mounting posts.

Three mounting posts replace the brush mounting studs on your machine, and are available in straight, 90 degree and 45 degree configurations with a variety of thread sizes.
