

CARBON BRUSHES

for wheel motor applications

Morgan Industrial Carbon manufacture and supply carbon brushes to suit OHV - Off Highway Vehicle applications.

The **T825** carbon brush is the primary approved brush for all GE776, GE787 and GE788 wheel motor applications.

The **T825** carbon brush will enhance commutator performance, by reducing the effect of 180° bar burning, whilst reducing the need for surface rounding brushes.

Part number - **41B537963P09**
 Dimensions - Length 57.15mm
 Width 57.15mm
 Thickness 19.05mm

“Fit and Forget” Surface Rounding Brush

For those difficult maintenance applications we are pleased to offer our “fit and forget” SRB. Utilising a small insert between the carbon brush wafers, the SRB is designed to gently remove rough spots and non conductive patinas that can have detrimental affects on commutator surfaces.

Part number - **41B537963P09SRB**
